**Congress Restricts Drilling Resulting In Higher Prices**

**Drill NOW! Produce MORE!**

Imported oil costs you and the rest of America about \$2 billion per day. That's money that is going to foreign governments, some of which do not like Americans very much. That is \$700 billion, the biggest expenditure in American history! That's 4 times more than the Iraqi War!

We could be drilling and finding more oil at home, but Congress has restricted drilling on 85% of federal lands in the Rocky Mountains and offshore. By restricting drilling and production, Congress has reduced the supplies of crude oil available, which has forced prices higher!

To learn more about getting involved in the **Drill NOW! Produce MORE! campaign**, go to [www.texasalliance.org](http://www.texasalliance.org).

Presented by the Foundation for Energy Education, Texas Alliance of Energy Producers, and the thousands of people in the oil and gas business in East Texas.
