

Texans take care of Texas.

**Always have.
Always will.**

That's why it's no surprise we're taking the lead in producing one of the largest sources of domestic energy in America — natural gas.

Natural gas and oil production is a major driver of the Texas economy. Oil and natural gas companies paid \$8.5 billion in Texas state and local taxes and royalties in 2009 alone. And they provide 315,000 Texans with high-quality, high-paying jobs.

Oil and natural gas means growth and prosperity that helps Texans take care of Texas. Always have. Always will.
